

USE YOUR HEADS— **DON'T FLUSH** YOUR MEDS!

DON'T flush unused, unwanted and expired medications down the toilet, **DON'T** throw them in the garbage and **DON'T** put them down the drains!

Although flushing medications was a common practice used in the past, new studies show that prescription and over-the-counter drugs are **not completely removed** when passing through waste-water treatment plants. Harm to marine and plant life can be caused by improper disposal.
