REASON FOR EXEMPTION <i>(see next page for further explanation):</i>			

I have read and declare that this facility meets all of the requirements for exemption from the Business Emergency/Contingency Plan. I understand that if conditions change at my facility, I am required to contact the CUPA to obtain permits and must submit a Business Emergency/ Contingency Plan through the California Environmental Reporting System (CERS).

REQUIREMENTS FOR EXEMPTION

Note: Quantities are based on the maximum amount of hazardous materials and/or hazardous waste on site at any time. Materials in the course of transportation are exempt only when under active shipping papers.

1. Facility will not handle extremely hazardous substances exceeding threshold planning quantities or regulated substances exceeding threshold quantities.
2. Facility will **not generate any** amount of hazardous waste.
3. Facility handles or will handle less than 55 gallons of a liquid, 500 pounds of a solid, or 200 cubic feet of any compressed gas.

Additional exemptions may include:

- A. If the facility handles less than 1,000 cubic feet of cryogenic, refrigerated or compressed gasses at standard temperature and pressure of any of the following:
 - a. Compressed gas hazardous due solely to asphyxiation & release pressure
 - b. Oxygen, nitrogen, and nitrous oxide handle at a physician, dentist, podiatrist, veterinarian, pharmacist, or emergency medical service provider business
 - c. Carbon dioxide
 - d. Nonflammable refrigerant gases
 - e. Gases used in closed fire suppression system
- B. If the only hazardous material present at the facility is new lubricating oil as long as the total volume of each type of lubricating oil does not exceed 55 gallons and the total volume of all types of lubricating oil does not exceed 275 gallons at any one time.
- C. The only hazardous materials present at the facility is 500 gallons or less of propane used for the sole purpose of cooking, heating employee work areas, and heating water within that facility.
- D. If the facility stores a total quantity of less than 1,320 gallons of oil in any of the following:
 - a. Fluid in a hydraulic system
 - b. Oil filled electrical equipment that is not contiguous to an electric facility
- E. If the facility handles less than 6, 000 cubic feet of helium gas for filling balloons.
- F. If the facility handles less than 6, 000 cubic feet of Carbon Dioxide (CO₂) for beverage carbonation.
- G. All hazardous materials exceeding these quantities are consumer products for direct distribution to and use by the general public.
